

Celanese Corporation
222 West Las Colinas Blvd.
Suite 900 North
Irving, Texas 75039

February 1, 2018

Dear Valued Customer,

On February 1, Celanese Corporation completed the acquisition of the thermoplastic custom compounder, Omni Plastics and its subsidiaries, including Resinal de Mexico.

Celanese Corporation is a global technology and specialty materials company that engineers and manufactures a variety of products essential to everyday living from intermediate chemicals to emulsion polymers to engineered materials. Based in Dallas, Texas, Celanese leverages chemistry, material science, and applications based on customer relationships and insight to create customer value.

This transaction extends Celanese's global leadership position in the engineered materials business, and when combined with Celanese's world-class operating model, enables Celanese to demonstrate the *art of material selection* and to be the first choice materials solutions provider for our customers. Customers will benefit from a global network of production sites, technical centers, and materials experts – creating new opportunities for us to collaborate with you and your customers to help deliver your goals.

Celanese is fully committed to Omni Plastics' customers and to excellence in products and services, including the customization for and responsiveness to needs of each customer. Celanese is built on our commitment to each and every customer.

By way of this letter, we would like to inform you that nothing will immediately change in conducting business with you. Legal entities, banking details, contacts, packaging, and commercial documents will remain the same.

Should you have any questions regarding the above, your Account Manager will be pleased to assist you.

Best regards,

Mark Murray
VP Materials Solutions Commercial, Americas
Celanese Corporation

Mike Wilson
National Sales Manager
